

COUNTY OF ONSLOW

## Onslow County Health Department

### Commonly Requested Immunizations/ Blood Titers for Employment

Your employer may require certain vaccines (shots) or blood titers (lab work proving immunity). The following is a list of some of these commonly requested shots and blood titers provided at the Health Department.

Vaccines / Shots / TB Screening	Usual number of doses required for immunity	Price per Vaccine <small>(incl. admin. fee)</small>
Measles, Mumps, & Rubella (MMR)	Two (2) doses over 30 days	\$95 each
Hepatitis A, Adult	Two (2) doses over 6 months	\$100 each
Hepatitis B, Adult	Three (3) doses over 6 months	\$86 each
Tetanus, Diphtheria, acellular Pertussis (Tdap)	One (Td recommended every 5 years)	\$75 each
Varicella (Chicken Pox)	Two (2) doses over 30 days	\$120 each
Polio (IPV)	Three (3) doses over six months	\$60 each
Flu	One (1) each year	\$50 each
Tuberculosis (TB) Screening <i>(insurance not filed)</i>	One (1) each year	\$25 each

A blood "**titer**" is lab work to prove that a person is immune to a disease. Some people may prefer to have a blood titer instead of receiving a vaccine or shot. This is especially true for people who remember having a disease as a child (ex: chicken pox) or someone who feels that they had all of their shots as a child, but cannot locate their shot record.

**In-Network with:**  
**BC/BS**  
**N.C. Health Choice**  
**Tricare**  
**Medicare**  
**Medicaid**

Blood Titer for Immunity	Price for Titer <small>(Includes collection fee)</small>
Hepatitis B Surface Antibody Titer	\$60
Mumps Titer	\$75
Rubella (German Measles) Titer	\$85
Rubeola (Red Measles) Titer	\$65
Varicella (Chicken Pox) Titer	\$75
