

## Utility: Wastewater - SEPTIC or SEWER

Utilities must be identified on the permit application.

*Proof of Sewer service is required, not septic if you are applying for: Residential or Commercial-New construction, Renovations that involve additional bedrooms, and any Home Occupation or Change of Occupancy.*

Environmental Health (EH) electronically validates Septic Permits (Improvement, Construction Authorization and Operations Permits). EH compares the number of bedrooms on the building permit to the septic system. They ensure the septic system permitted is sized sufficient to handle your needs and that the drain lines and repair areas are not being built upon.

The process to apply for a septic permit and receiving an inspection is conducted through Environmental Health. Environmental Health is located on the 3<sup>rd</sup> floor of the Onslow County Health Department.
